

Aerial Equipment Safety Program

Genie® factory authorized four-hour Operator Safety Training Program for Genie® aerial equipment.

- Course includes both classroom & hands-on instruction on:
 - Self-Propelled Boom Lifts
 - Self-Propelled Scissor Lifts
 - Vertical Personnel Platform Lifts.
- After successfully completing all aspects of the training participants receive:
 - Informational Training Binder w/copy of Course Instruction
 - Operator Training Certificate
 - Genie® Authorized Operator Card
 - Sample copy of Daily Operator Inspection Sheet.

Due to the hands-on nature and individual attention required, the maximum training class size is 10 people. For instruction detail, classes of 5-8 people are strongly encouraged.

All equipment, safety apparel and required materials are included in course registration fees. Additional materials available for purchase upon request at course completion. Individuals requiring special needs, must inform Vandalia Rental upon, or prior to course registration.

The Genie® Training Experience

Employers are obligated to provide employees proper and adequate training in the use of all work equipment. This comprehensive aerial work platform (AWP) training program was developed by Genie® industry professionals, specifically for platform operators and meets all current OSHA requirements.

By combining comprehensive theory and practical review of self propelled boom lifts, self propelled scissor lifts, and vertical personnel platform lifts; and by allowing both experienced and inexperienced operators a safe environment to properly operate aerial equipment, workplace accidents can be avoided. Trainees successfully completing both the classroom and hands-on training receive a comprehensive safe

operations training binder, sample copies of daily AWP pre-operation inspection sheets, an individualized aerial access card, and a certificate of course completion.

Aerial work platforms are designed to be easy to use and offer a safe way to work at varying heights, on varying terrains; however, without proper training, risk of serious injury, or even death, can occur. As your equipment partner, and as part of our ongoing dedication to safe

equipment operation, we're partnering with our customers to provide industry leading AWP training. Additionally, all participants successfully completing training qualify for **100% reimbursement of all training course fees incurred!** (See Course Registration for more details)

Workplace accidents are costly, and at times even tragic. With proper and adequate training, workplace accidents can be prevented. Call your sales representative for more program details or to make scheduling arrangements.
